

Patient Request for Email Communications

Patient Name: _____ Date of Birth: _____

Phone Number: _____ Email Address: _____

Communications over the Internet and / or using the email system may not be encrypted and may not be secure. There is no assurance of confidentiality when communicating via email. To request that this provider/program communicate with you via email you must complete this form and return it to your health care provider's office.

Please be advised that:

- **This request applies only to the healthcare provider or program that you indicate below. If you would like to request to communicate via email with another health care provider or program, you must complete a separate request for that office.**
- Columbia University Medical Center will not communicate health information that is specially protected under state and federal law (e.g., HIV/AIDS, substance abuse, mental health information) via email.
- You must provide your email address when registering for your visit with your provider
- It is recommended that you send a test email before corresponding via email.

I understand and agree to the following:

- I certify the email address provided on this request is accurate, and that I accept full responsibility for messages sent to or from this address.
- I have received a copy of the IMPORTANT INFORMATION ABOUT PATIENT EMAIL form, and I have read and understand it.
- I understand and acknowledge that communications over the Internet and/or using the email system may not be encrypted and may not be secure; that there is no assurance of confidentiality of information when communicated via email.
- I understand that all email communications may be forwarded to other providers for purposes of providing treatment to me.
- I agree to hold ColumbiaDoctors and individuals associated with it harmless from any and all claims and liabilities arising from or related to this request to communicate via email.

Important Information About Patient Email

As a patient of ColumbiaDoctors, you may request we communicate with you by electronic mail (email). This Fact Sheet will inform you about the risks of communicating with your health care provider or program via email and how ColumbiaDoctors will use and disclose provider / patient email.

PLEASE READ THIS INFORMATION CAREFULLY

Email communications are a two-way communications. However, responses and replies to emails sent to or received by either you or your health care provider may be hours or days apart. This means that there could be a delay in receiving treatment for an acute condition.

If you have an urgent or an emergency situation, you should not rely solely on provider / patient email to request assistance or to describe the urgent or emergency situation. Instead, you should act as though provider / patient email is not available to you and seek medical attention.

Email messages on your computer, laptop, or other device have inherent privacy risks especially when your email access is provided through your employer or when access to your email messages is not password protected.

Unencrypted email provides as much privacy as a postcard. You should not communicate any information with your health care provider that you would not want to be included on a postcard that is sent through the Post Office.

Email is sent at the touch of a button. Once sent, an email message cannot be recalled or cancelled. Errors in transmission, regardless of the sender's caution, can occur. You can also help minimize this risk by using only the email address that you provide to our practice/ program/ provider.

In order to forward or to process and respond to your email, individuals at ColumbiaDoctors other than your health care provider may read your email message. Your email message is not a private communication between you and your treating provider.

Neither you nor the person reading your email can see the facial expressions or gestures or hear the voice of the sender. Email can be misinterpreted.

At your health care provider's discretion, your email message and any and all responses to them may become part of your medical record.
